Thermostat

Control at
the touch
of a button

Indoor comfort at the touch of a button? Absolutely.

Every homeowner knows that temperature sweet spot where their home feels not too hot and not too cold, but just right. The ComfortSense® 3000 Series programmable and nonprogrammable thermostats deliver accurate control so your indoor air stays at exactly the temperature where you feel most comfortable. And with a large display and user-friendly settings, you'll always feel completely in control.

Simple, intuitive design for hassle-free comfort.

ComfortSense 3000 Series thermostats are designed with simplicity in mind, with user-friendly controls that are easy to understand and adjust. Large rubber buttons and backlit display allow you to quickly find the right setting, day or night, for 24/7 comfort.

Precise operation ensures your home air is always "just right."

The advanced electronics inside ComfortSense 3000 Series thermostats provide accurate temperature control at the touch of a button. Once you've adjusted your home's temperature, the thermostat works with your HVAC system to accurately maintain the desired temperature.

Quality you can trust for complete peace of mind.

ComfortSense 3000 Series thermostats are built with reliable, time-tested components and backed by the Lennox name. A 2-year limited warranty* provides additional assurance for worry-free comfort, season after season.

*Applies to residential applications only. See actual warranty certificate for details.
